THE LARGEST SINO-FOREIGN JOINT VENTURE ENTERPRISE IN CHINA LIFT INDUSTRY

Since Shanghai Mechanical & Electrical Industry Co., Ltd. established the joint venture with Mitsubishi Electric Corporation and another two parties in 1987, Shanghai Mitsubishi Elevator Co. Ltd. has insisted on the prospects of being an international and regional well-known enterprise, struggling to be in the front rank of world-famous elevator enterprises. SMEC persistently introduces global cutting-edge and energy-efficiency elevator technology, improves outstanding management quality system in all aspects, and produces arresting business achievement and social benefits. All the major financial indexes have been in the leading position in China lift industry since 1993.

In this modern society with high efficiency and fast tempo, elevators are not only the vehicle for vertical transportation, but also regarded as the room for communication of humankind. Our duty is not only to produce impeccable elevators and offer adequate and systematic service.

We treat elevators as the inseparable part of civilization throughout, and our mission is to found the harmony for modern society.

One company should make profits for itself and also need create value for the society.

That kind of creation shall be supported by cutting-edge technology and advanced management. Thereinto, one representative is the achievements of annual production over 70,000 sets, altogether 450,000 sets accumulatively, which is a great contribution to China lift industry since the establishment of Shanghai Mitsubishi Elevator Corp. in 1987. (Up to the end of 2013)

- Shanghai Mechanical & Electrical Industry Co., Ltd.
- Mitsubishi Electric Corp., Japan
- China National Machinery Import & Export Corp.
- Mitsubishi Electric Hong Kong Group Limited

COMPANY STATUS (up to the end of 2013)

- Address: Jiangchuan Road No. 811, Minhang District, Shanghai
- Date of establishment: January, 1987
- Investors: Shanghai Mechanical & Electrical Industry Co., Ltd. (52%), Mitsubishi Electric Corp., Japan (32%), China National Machinery Import & Export Corp. (8%), Mitsubishi Electric Hong Kong Group Limited (8%)

- Total Investment: 200 Million USD
- Occupation Area: 273,000m²
- Construction Area: 180,000m²
- Employee Number: 1836
- Branch Office Number: 70

CORPORATE PHILOSOPHY

Excellence in Corporate Philosophy is the source of enterprise development strategy. In the process of development, confronting this ever changing market circumstances, Shanghai Mitsubishi innovates our corporate philosophy from "Customers' Need is the Pursuit of Shanghai Mitsubishi", "Concentrating on Customers", to "Creating More Harmonious Space of Life", which fundamentally guarantees the sustainable rapid growth.

Creating More Harmonious Space of Life

Concentrating on Customers
Transcending Ourselves
Starting from Scratch

SALES PERFORMANCE

Under the outstanding leadership of both investor parties of China and Japan, and in efforts of all the staff, Shanghai Mitsubishi adheres to customer-oriented values, with persistently increasing the abilities of development, manufacture, service, management control and learning, and boosts two transition to business service oriented type and quality-benefit type. Shanghai Mitsubishi successfully seized the historic opportunity of Reform and Open policy in China, and its market share has been in the leading position since 1993, and it has broken the record of annual production, sales amount and accumulative delivery amount among lift companies in China. Moreover, it has the highest annual output and sales volume for a single factory in the world since 2005.

- 2013 Accumulative lift delivery **450,000** sets, annual production and sales amount over **70,000** sets.
- 2012 Accumulative lift delivery **360,000** sets, annual production and sales amount over **62,000** sets.
- 2011 Accumulative lift delivery **300,000** sets, annual production and sales amount over **45,000** sets.
- 2010 Accumulative lift delivery **250,000** sets, annual production and sales amount over **40,000** sets,
Income of primary business over **10** billion.
- 2008 Accumulative lift delivery **200,000** sets annual production and sales amount over **30,000** sets.
- 2007 Accumulative lift delivery **150,000** sets.
- 2005 Annual production and sales amount over **20,000** sets, become largest single factory in lift industry all over the world.
- 2004 Accumulative lift delivery **100,000** sets.
- 2002 Annual production and sales amount over **10,000** sets.
- 2000 Accumulative lift delivery **50,000** sets.
- 1993 Accumulative lift delivery **10,000** sets.

SALES SERVICE

Shanghai Mitsubishi adheres to the sales strategy of "Throughout Cover, Longitudinally Develop", and successively set up 7 regions, 70 branch offices and more than 300 self-owned maintenance stations all over the nation. Over 1,800 employees in the headquarters, 3,100 employees in branch offices and the service network including more than 15,000 cooperative members (up to the end of 2013), have covered all of main cities throughout the nation. SMEC will serve our customers with the most professional, thoughtful one-station service from sales, manufacture, installation and maintenance wholeheartedly, and fulfill social responsibility of our company as well.

Shanghai Mitsubishi keeps exploring the overseas markets. Through the sales network comprised by the agencies all over the world, SMEC exports our product to altogether 76 countries and regions, covering five continents (up to the end of 2013). The reputation of Shanghai Mitsubishi in oversea markets has been further enhanced.

TECHNOLOGY DEVELOPMENT

Shanghai Mitsubishi adheres to the strategy that regards dynamic introduction and self innovation as equal importance. It not only imports of advanced elevator techniques, guiding China's lift industry to undergo a leap-forward development; but also sets up national technique center initially in the industry. With technique innovation system of "one generation for production, one generation for development, one generation for pre-development", it keeps itself in the leading position of technology with foresighted consciousness.

QUALITY-CORED OUTSTANDING MANAGEMENT SYSTEM

Shanghai Mitsubishi always regards product quality and customer service as most priority. The company has already passed management system verification of ISO9001, ISO14001 and OHSAS18001 and CE lift directive verification of Europe United initially in the lift industry, and was awarded "National Quality Management Award" in year 2002 and 2011 as well, which is the top award in the field of China Quality Management, becoming the sole company winning that honor that in lift industry. SMEC president Fan Binxun also won the sole individual award of the 1st Shanghai Mayor Quality Award.

Through the implementation of CIMS application engineering, upon professional software like SAP, R/3, SMEC has set up the information network covering the headquarters and nationwide branch offices of the company, forged the outstanding management platform covering all process of development, sales, manufacture, installation, maintenance and etc...

ADVANCED MANUFACTURE CAPABILITY

Through self accumulation and self development, SMEC accelerates the expansion of production capacity and factory reconstruction, and successfully completed construction project from Phase 1 to Phase 6. Quantities of world class equipments enhance the company ability and potential capability, and lay a solid foundation for swift and continuous expansion of production capacity.

- Occupation area of company is **3.3** times of that in the early period of joint venture
- Construction area of company is **5** times of that in the early period of joint venture
- Net assets of company is **74** times of that in the early period of joint venture
- Total assets of company is **80** times of that in the early period of joint venture (Statistics on Oct. 31st, 2011)

SHANGHAI TOWER

Shanghai Tower, located in Lujiazui of Pudong, adjacent to JinMao Tower and Shanghai World Financial Center, is currently the highest building in China. The height of main body building construction of “Shanghai Tower” is 580m, and the apex of it is 632m. On Sep. 30th, 2010, Shanghai Mitsubishi officially won the bid of section A with 54 units of middle-high speed elevator. In May, 2011, Shanghai Mitsubishi officially won the bid of section B with 52 units of middle-high speed elevator. The bid of section A and B consists of all elevators at highest part from floor 84-120, including hotel, observation area and podium building. The bid of section A and B of Shanghai Tower is the “peak” in global lift industry, and will create several world records in lift industry.

- Highest**——Shanghai Tower reaches the height of 632m, over Taipei 101 Mansion (508m) and Shanghai World Financial Center (492m), and becomes the highest building in China;
- Fastest**——3 units of shuttle elevator from bottom floor directly to observation hall at floor 118, with travel distance 565m and speed of 18m/s, will become the fastest elevators in the world. It also will break the world elevator record of travel height in Dubai Tower (travel distance 504m)
- Largest**——Four units of double-deck shuttle elevator are direct to hotel aerial lobby at floor 101, with traveling distance 470m and speed of 10m/s, will become the double-deck elevators with highest traveling distance in the world. Fresh-newly developed PM magnetic permanent synchronous traction system with maximum power of 360kW in the world is equipped (adopt double three-phase coil technique) as well.
- Latest**——all 11 units (3 units of 18m/s elevator, 8 units of 10m/s double-deck elevator) in Shanghai Tower are equipped with in-car air pressure adjustment device (ensure that passengers won’ t feel uncomfortable to their ears due to the swift change of air pressure in the up & down running with high speed), which is also the first in China.
